Inspection 8.23.14. On hill facing S.W. + exposed to wind coming along valley in that direction. S. on grassy hillside land.

W. 40 yds flat then slope amount to say 10".

S. slight rise

Suggested moving 75 yds W to place more level slope (same altitude) where shelter is obtained + g. is out of direct path of wind. This should be a very good position.

* This g. has always been at 1422 ft. but mistake was not found until a section was recalled (J.R. Davidson 7.1.22)
