1864 Max Nov. 24" = 1.60

1868 Nearly 3 in + average here, the chief characteristic of the year has been violent storms of wind & rain, the storm signal has been up 6 times in December and was always followed by storms some of which lasted three or four days, I have kept a register of 16 heavy gales during the year when the signal was up and only once was the signal up when no storm followed.
