1864 The heaviest and most flood causing fall was on the 25th March .98 fell in 14 hours. The rain commenced at 8.30 AM & by 11 PM every part of the country in which the levels would permit it were flooded.

1865 by on an eastern slope sheltered by a house 15 ft off otherwise free.

1868 The driest May June & July I have ever recorded yet from the heavy falls in Jan & Dec the total fall exceeded that of any other yr I have noticed.

1869 This year like 1868 has been divided into two strong marked periods, the one very dry, the other very wet. the result being in both cases that the fall far exceeded the average.
