The gauge stands in a large garden sloping to the South, belonging to the former Rectory House of Clougherney; the House is within a mile of the village of Beragh, and about 7 miles E.S.E. from Omagh. The ground rises gradually to this from the Coast of Donegal Bay, near the point where L. Erra discharges itself, about 40 miles W by S from us, and continues to rise for 9 or 10 miles, farther to the village of Pomeroy, which is situated near the water ridge separating the waters which run to Lough Neagh from those which run to Lough Foyle. This slope of the great table land of Tyrone is fringed on the NW by the hills of Donegal &erry, and is exposed to the vapour-laden winds from the Atlantic the rainfall is accordingly much greater on this slope than to the NW of it.

The G: stands in a large garden sloping to the South, below  
ing to the former Rectory House of Clougherry; the house  
is within a mile of the village of Beragh, and about 7 ml  
E.S.E. from Omagh. The ground rises gradually to  
this from the Coast of Donegal Bay, near the point  
where Lake Lina discharges itself, about 40 miles W.S.W.  
from us, and continues to rise for 9 or 10 miles farther, to  
the village of Pomeroy, which is situated near the Water  
Ridge separating the Waters which run to Lough Neagh,  
from those which run to Lough Foyle. This slope of  
the great Table land of Tyrone, is fringed on the N.W. by  
the hills of Donegal & Derry, and is exposed to the vapour  
laden winds from the Atlantic.
