TOTALS ...	61.88	69.72	(71.76)	69.17	72.19	56.87	81.09				

† Inspected by Dr. Hill IX.12. G. on edge of sharp rag sufficient to give rise to ascending currents and account for low readings.

1912 April "the record was 1.37 but no sharp rag evidently seen compared with the figure 1.32 which has been substituted by the 11mm. proportionally daily of the S.S."

Rejected from Survey: 114° too low

† Inspected by Dr. Mill IX.12. Better exposure than gauge A.

1912. The record for April was 2.42 but as the gauge had evidently been tampered with the figure 2.24 has been substituted after the proportion of the daily fall at the S.S. over the 11 months.

Rejected from Survey: 5" too low
