C O C

1874 " Certain trees & shrubs in the neighbourhood of the gauge appear to be encroaching on its surrounding space we have therefore determined to remove it to a more exposed position for the new year. The fall here has decreased in comparison with other Wiltshire stations very considerably since the gauge was first set up & I can only account for this by supposing that the trees have encroached a great deal.

1875 No surrounding object at a greater angle than 45°

1876 Observer moved away
