Note by Observer

"Until the early part of 1905 the gauge was on the ground but being inconvenient to reach in slippery weather and also too crowded in by rose trees etc it was moved to present position."

Measurements taken, as a rule, between 9 and 10 a.m.

In the years 1895 to 1898 the amount was entered in error under date when observation was made instead of to previous day."

1905 gaugewood about 12 ft N.E. early in year

Sr John Church 1/4 mile SE
