N.B. The gauge was discovered to be leaking badly in June 1931. Average from survey reflected as 3" high. Values prior to July 1931 should be ignored. A new average should be worked when 5 years records are available from 1932. As 1937-32 reflected from survey as 1" high. Means should be examined for leaks & g. covered to 1 foot.

1935. Trees & houses in vicinity prevent the taking of even approximate bearings.
