December.....						2.09	2.86				
TOTALS.....						28.4	32.71				

1874 The account for Dec^r cannot be accurately filled in from beginning to the end of the month snow & very severe frost continued. The gauge was frozen almost every night and the opening at the top was filled in a moment whenever a sharp snow or hail shower set in. Rain fell twice on the 16th & 21st but in each case it only served to cover with ice the snow collected in the earlier part of the day. The figures I give for the month represent the result from melting the snow and marking it as rain.
