1924 Low - not published.

1925. " " "

1926. Inspected by Mr. Jackson on 30 April. The gauge is on NE side of railway line in an iron fence enclosure. The general exposure is fair but records likely to be low at times of rain, owing to wind eddies. The fence that funnel is not deep enough to hold a weatherfall. Stone wall 3' 11" high protects gauge from snow blowing between N & E with rise gauge is very exposed. See sketch over photograph in file N° 669659/26.

Aug 12 New 6" gauge sent on loan to be fixed 200 to 300 yds nearer Buxton (see sketch in 4669659/26)

1928, 1927 Record from Mo. Loan gauge. For comparison see Green Hill.

1925 Old Gauge moved to position occupied by Loan Gauge. See Green Hill.
N.B. Corrected from survey as 2' low.

Position of Station on reduced Ordnance Survey Map, 2 miles to 1 inch Series
