1946. Wire Fence 3' high 18'x18' m.p. awaiting inspection.

25.8.47. Inspected by Dr. Haselwood. Engineer writes "I am personally familiar with the site of this gauge & I think it is the best site which can be found in this valley, but in the case also we are asking the shepherd to take note of whether on dipping or off-dipping is the predominating wind, but as you very rarely get two snowstorms in succession where the wind influence is the same I think that we are probably asking the shepherd to make too much use of his imagination."

1947 Jan. Bar est 110.3. 1948. Shows low several months (July, Aug, Sept).
