September --										2.34	
October --										2.22	
November --										4.33	
December --										1.95	
TOTALS --										23.53	

On 8 Nov 1974 I examined the original diary of John Hooker in the Royal Society Library (MSS MA187 & MA188). At the end of MA188 are several pages giving John Hooker's own summaries of the daily record, including the monthly rainfall & a kind of abridged monthly weather report extending from Jan 1729 to Dec 1764. Hooker gives, in his own handwriting, his observing site as being Falkham for 1729, 1730, Northfleet for 1731-1733 and Turnbridge for 1734-1764. The above record for 1729 was extracted from a summary by George Hadley published in Phil. Trans. Vol 40, pp 154-175 and Vol 42 pp 243-263.
