TOTALS			40.34	26.99	25.24	36.05	37.36				

"My gauge is $5\frac{3}{4}$ inches in diameter, of glass, and the rain falls into a glass tube 1 inch in diameter graduated in inches & tenths. I have a table by which I calculate the fall, having drawn it out with a cylinder $5\frac{3}{4}$ inches in diameter, with exactly 3 inches of water giving $38\frac{1}{2}$ inches for one foot the funnel is of glass 6 ft from the ground to overtop a garden wall, far from shrubs
