1942. Enc. 189: - gauge enclosed in fence, area 15ft square, constructed of 3" bars at 6" pitch. Obsr suspected that this was reducing the catch of the gauge, particularly during high winds. Another similar gauge was set up a short distance away, outside fencing. This was found to give somewhat higher readings on certain days, & future readings entered on 1949 will be from this gauge.

1943. Gt. fib. the readings are from gauge outside fence.

1944. n.p. low. Gauge moved 29.10 x 320ft S. (further from embankment). Embankment 49ft high: 380ft N.

1945. n.p. low. Gauge (outside fence) installed with barbed reading available.

1946. 7.6 in. high. Fenced fence (approved by M.O. 45) had been erected (commence of a distance of 219' 7" high. 7' diam bars 6" apart).

This Reading embankment 49' high 380' N.

77th. An average value of 55.2 in. (1909-43) has been rejected as being 12 in. low
