The observer noted the daily measurement on a sheet (D) one of 45 printed sheets, and copied the daily figures for each month on another printed sheet (C) & sent this to Mr. Balme.

There are also some clean copies of D on similar sheets (CC) and some of G.I. S. slips (S) printed for return of monthly totals, No. of days & greatest.

A letter from Park to Mr. Balme, in answer to an enquiry about discrepancies, states that D is the original, & correct, & C may be miscopied.

I therefore take D, wherever it exists, after comparing with the others, which sometimes (especially C) elucidate doubtful figures.

I have indicated, above the date for the year, which of these authorities is available. *Colman's Handbook May 99*
